SRL Telematics

Asset Security & Functionality Tracking

SRL Telematics offers a more efficient way to monitor your fleet. With advanced tracking, alerting, and reporting capabilities, you gain full visibility and control over your assets — all from a single, secure platform.

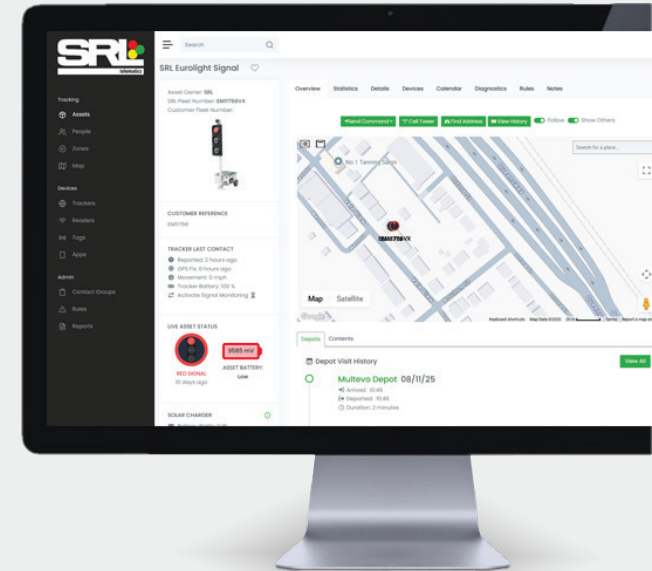

Key Features:

- **Low Voltage Warning**
You'll receive an email/text notification when an asset's battery is low, so a battery exchange can be arranged.
- **Latest Signal Change**
This feature shows you whether your lights are functioning properly, so you don't need to attend the site, saving both time and money.
- **Motion Alerts**
This feature sends an alert if your assets are moved or tampered with or moved.
- **Geozones**
You can set up geozones to send alerts when your assets enter or exit designated areas.
- **Asset History**
This allows you to track the movements of your assets, ensuring they're easily locatable.

Why Choose SRL Telematics?

- **Real-Time Monitoring**
Track your fleet's location, battery health, and signal status with automatic updates.
- **Low Voltage Warning**
You'll receive an email/text notification when an asset's battery is low, so a battery exchange can be arranged.
- **Enhanced Security**
GEO-fencing and theft alarms protect your assets from unauthorised movement or tampering.
- **Smarter Resource Planning**
Plan battery exchanges and maintenance routes more efficiently, reducing travel time, fuel use, and labour costs.
- **Intuitive Platform**
Access everything via a secure, browser-based portal compatible with mobile, tablet, and desktop. Interactive maps make asset management simple and visual.
- **Full Data Access**
View historical performance data for reporting, analysis, and operational insights. As well as to track the movements of your assets, ensuring they're easily locatable.
