

EXPERTS IN PORTABLE
TRAFFIC TECHNOLOGY

SRL Radio Remote

The SRL Radio Remote is a lightweight, hand-held remote control which allows the operator to control up to four phases of traffic. It features ALL RED and Manual mode and allows operatives to stay at a safe distance from live traffic to control signals.

Key features:

- > 300m operating range
- Easy to install; connect the receiver then you're good to go
- Easily select which phase you'd like to run
- Control up to four phases independently
- ALL RED function
- Manual mode button
- Battery powered

Key benefits:

- Improved health and safety on site - operatives can work from within the safety zone
- More efficient control - operatives can go from any phase to any phase, no more cycli orders
- Compatible with Radiolight® (Including Pedestrian Signals), Radiolight® Compact and ELC units.
- Built to last, the SRL Radio Remote is a waterproof and rugged handset.
