

# Ways of Working with SRL

---

A service you can trust

# Flexible. Reliable. Seamless.

**SRL Traffic Systems has the UK and Ireland's largest fleet of portable and temporary traffic signals.**

With more than 25 years of experience in the manufacture and supply of temporary and portable intelligent transport systems, we provide a full service offering. This means we don't just sell or hire equipment. We are proud to be on the frontline with our customers 24/7, 365 days a year, becoming a part of your team.

Our solutions can be tailored to meet your needs in a range of sectors beyond road repairs, improvement and development. You can also find us in use on construction sites, around airports, in quarries, at outdoor events, music festivals and in many more environments; wherever there's a temporary requirement for safe traffic or people management.

## A **product portfolio** that goes a lot further than red, amber and green

Besides designing, manufacturing and supplying the most extensive range of pedestrian and traffic light systems in the country, we also supply a range of related products to meet a wide variety of requirements.

-  **Portable Traffic Signals**  
A range of versatile portable traffic signals and pedestrian systems for use in a number of traffic flow situations.
-  **Temporary Traffic Signals**  
For use for traffic management where more impact is needed and, generally, for the long term.
-  **Smart Variable Message Signs**  
A range of colour mobile variable message signs (VMS) available in different sizes.
-  **Urban Traffic Management & Control**  
Allows local authorities to remotely control systems from the In-Station.
-  **CCTV**  
Ideal for on-site security, keeping track of road closure points, monitoring traffic flow, or for use at all kinds of events from demonstrations to music festivals. Available with AI functionality to detect loitering and motion.
-  **Accessories**  
We provide a range of accessories to further enhance your SRL experience, such as battery charging benches, telematics, security locks and trailers.
-  **Haul Route Crossing Systems**  
Haul Route PLUS is an automated barrier control system which gives full control of road / access closure to both private sites and public roads.
-  **Automatic Barriers**  
Instaboom is the UK's first solar / hybrid instant deployment, work zone protection vehicle barrier to enhance safety and security.

## Our Hire Fleet

Our hire fleet undergoes routine maintenance and servicing to ensure optimal reliability is delivered time after time. What's more, our 100% stockholding and next-day delivery for all component parts means that when something isn't working, we can sort it with minimum disruption.

The majority of our products are now available with solar hybrid technology, which is great for you and your company. This means a reduction in battery exchange for months at a time whilst reducing usage and emissions, which makes traffic management more sustainable and better managed.

All SRL products are available to hire, however products such as Urban64, Instaboom, CCTV and UTMC are not available to purchase. If you wish to find out more about our wider portfolio options, please contact us today.

## Three ways of working with SRL

### When Hiring Ad-Hoc

If your workload varies and you need to hire traffic control or related equipment on an Ad-Hoc basis, our fluid hire fleet and infrastructure, that gets our products to where you need them, can save you a high-cost outlay and ongoing liability of ownership.

### When You Contract Hire

A full wrap around service solution at a fixed cost. An ideal solution for 'bread and butter' work that helps you to forecast costs, allocate resources and plan your fleet requirements. Alongside our 24/7, 365 days a year customer support offering, we work to a 2-hour response time and nationwide delivery – we are ready to go. As a Contract Hire customer, you receive custom-made boxes that are entirely coloured to match your brand.

### When You Purchase

If you operate using an ownership model, you can 'top-up' your SRL assets with items from our hire fleet, and also enhance them with the purchase of new technologies, such as solar powered equipment and Urban Traffic Management & Control. Purchasing doesn't include the provision of frontline service.

# Ad-Hoc and Contract Hire benefits

By becoming an SRL partner, we can take care of traffic management and services on a 24/7, 365 days a year, 2-hour call out response time, leaving you to concentrate on your work in hand.

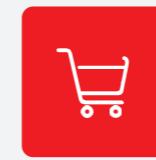

## Helping you win more work... nationwide

We can deliver to and collect from any location, enabling you to tender for work in any geographical location. If a project calls for traffic management, then a single call to us will sort it, helping you to grow your business.

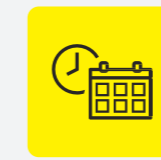

## An extension of your team

Recruiting, training and retaining maintenance staff for your traffic management equipment can be an expensive challenge to meet, but it needn't be.

Ad-Hoc or Contract, if you hire from us, we will relieve you of all the worry of maintenance and repair work, effectively becoming your traffic management partner.

Purchase

Contract Hire

Ad-Hoc Hire

Purchase	Contract Hire	Ad-Hoc Hire	
█	█	█	Product Training
█	█	█	Warranty
█	█	█	Diagnostic / Repair Service
█	█	█	Telematics
█	█	█	2-Hour Response Time For New Hires

# A complete managed hire service for your business needs

## Hire Benefits

### The Latest Innovations

Our newest products are always launched to hire customers first, with thanks for their loyalty.

### Guaranteed Availability

Comprehensive product portfolio to fulfil all your traffic management needs.

### 100% Stockholding

Across more than 30 nationwide depots.

### SRL Telematics

Monitor your assets' performance, battery levels, functionality and location.

### Battery Charging and Exchange Service

In-depot charging facilities and on-site exchange service available.

### Regular Maintenance

In-depot asset servicing available for six-weekly and six-monthly maintenance.

### 2-Hour Breakdown Response

We're ready to support you, when you need us most. Without exception

### 2-Hour New Hire Response

With your dedicated account manager and direct line to SRL, we'll instantly respond to new hire requests.

### Delivery and Collection

24/7 onsite support from your local team, we'll work seamlessly as an extension of your business.

# Ad-Hoc, Contract Hire and Purchase: The differences at a glance

---

As you can see, opting to hire your equipment – Ad-Hoc or Contract Hire – brings with it a comprehensive service package in comparison to choosing to purchase outright. A hassle-free hire solution can save you money, too. All of your standard working overheads can be reduced by hiring from SRL. Meaning less time and money spent on repair, wear and tear, so there are no worries about asset depreciation and even less people power.

## A supply chain partner you can trust

- We are the only manufacturer of traffic light and related equipment capable of providing the constant support you need, 24/7, 365 days a year.
- A level of dependable service we've been providing for over 15 years.
- Find out more about how purchasing or hiring from us makes good business sense – contact us at [sales@srl.co.uk](mailto:sales@srl.co.uk) or [hire@srl.co.uk](mailto:hire@srl.co.uk)

Hiring equipment means that we benefit from the most up to date systems, but it also means that we can add to the fleet whenever we need to. We can quickly adapt to our customers' changing requirements and deploy additional equipment to them at short notice.

David Oswald  
Managing Director - CTM

# Wherever you are, we're right by your side

---

With 25+ depots across the UK and Ireland, we're never far away from where you are, ready to react and support you in whatever situation you find yourself in – and when you do need us, we guarantee a 2-hour response time to site.

Always ready to act, every hour of every day.

Our experienced team is always available when you need them. We are proud to be on the frontline with our customers, 24/7, 365 days a year.
